## **Radiologists in the Valley go paperless**

Naugatuck Valley Radiology Associates has gone paperless, buying a system from a California-based company.

The 125-person practice includes eighteen radiologists operating out of six locations, including Naugatuck, Southbury and Prospect.

Naugatuck Valley Radiology Associates, after two years of research, selected Los Angeles-based MedInformatix's system.

MedInformatix RIS incorporates scheduling, registration, technologist and radiologist workflows as well as billing, EDI, custom reporting, collections and more.
