PrimaCare Seeks Partnership with MedInformatix

Dallas, TX – MedInformatix took PrimaMed Physicians Associates Live on March 01, 2007 with all their 11 walk-in Urgent Care locations throughout the Dallas region. Also known as PrimaCare Medical Centers, this organization has been serving its community since 1979. Showing its commitment to serve and succeed, PrimaCare recently had four of its clinics enter into an agreement with Collins County. This agreement allows PrimaCare to provide treatment to anyone who is below the Federal Poverty Level and who does not have any type of health coverage for a small co-pay. PrimaCare is considered by many, in Dallas, to be their primary healthcare source.

In December of 2006, PrimaCare elected to partner up with Electronic Medical Record and Primary Management and Billing software specialists, MedInformatix. After almost a year of research, Jennifer Stephenson and her staff figured that MedInformatix would provide a seamless integration of scheduling and billing to her busy centers which see 45 – 55 patients a day each. PrimaCare wanted a product that would cut down on man hours and improve workflow with their labs. Phase one, which was installing and training by MedInformatix for the Practice Management and Billing is complete. The second phase, implementing an Electronic Medical Record system is set to start in Summer '07.

MedInformatix based out of Los Angeles, CA, provided PrimaCare with an interface to LabCorp and Quest, the two leading medical labs in the nation. With all clinics connected to each other, sharing results have never been easier and hassle free. Not to mention, the processing claims for all 11 Urgent Care Centers are now done at one central location. MedInformatix's Auto Remittance Module is proving to be priceless for a practice that sees between 500 – 600 patients per day, most of which are walk-ins.

PrimaCare will be able to have 90 users logged in between the EMR and PM software at anyone time. And should they decide to expand again, MedInformatix will easily be able to accommodate this need. MedInformatix is partnered with a Nevada group who has over 450 users on at any given time.

About MedInformatix:

MedInformatix, Inc. is a leading national provider of fully integrated Electronic Health Records. The products have been built around MedInformatix's 25 years of workflow expertise. Our product is designed on a single database using Microsoft SQL. Whether the installation is a single physician who went Live in 1994, a national Cardiology practice, the busiest Radiology practice in Manhattan, or one of 15 other specialties we service, we accommodate their needs. See why so many practices from various
