To Potential MedInformatix Clients:

I am the Support Services Manager for Midwest Eye Care, P.C. an ophthalmology practice located in the Omaha, Nebraska metropolitan area. We have 11 ophthalmologists with specialties in retinal, corneal, glaucoma, and general surgery. There are 5 optometrists. We have four metro area clinic locations, a surgery center, and outreach clinics in three states.

After a year of evaluating different software systems, we made the decision to work with MedInformatix at the beginning of 2000. We went 'live' with MedInformatix's practice management in October of 2000 and the electronic medical records in June of 2001. Our clinic had a realistic approach to the implementation process, understanding that change doesn't occur overnight and without work from both parties.

In the past ten years, our practice grew from 8 to 16 providers. MedInformatix's flexibility accommodated this recent growth, while allowing us to reduce the staff responsible for medical records management by a little more than half. In the current reimbursement environment, MedInformatix software possesses the most current certifications allowing us to qualify for Medicare bonus reimbursement.

Overall, a software decision we made almost ten years ago would be the same one I would make today, and that says a lot for MedInformatix.

Sincerely,

**Colleen Naughton
Support Services Manager
