## **MEDINFORMATIX BRANCHES OUT TO ORTHOPEDICS, CUSTOMIZING ITS SOFTWARE TO NEW FIELD**

*Software Solutions Award Winner Installs Made-to-Order System  
for Florida Practice*

**LOS ANGELES, CA, MAY 2008** -- MedInformatix, a leading provider of IT solutions for the healthcare industry, announced today that it had broadened its reach as a practice management systems (PMS) and electronic medical records (EMR) provider to include the orthopedic field. Dr. John Kagan, of Kagan, Jugan and Associates, Ft. Meyers, FL, is one of the first orthopedic sites to implement the MedInformatix solution to create a customized, paperless office, interfacing all billing, insurance and medical data.

“Through our extensive work with oncology and radiology practices, we have been able to develop a unique template that is customizable to other medical fields. No matter what the specialty of the physician or the medical group, MedInformatix analyzes the needs, organizes the office and patient data then takes it to the next electronic step,” said Tom McGonigle, president, MedInformatix. “Dr. Kagan sought a versatile software system whose open architecture could streamline his office workflow as well as integrate elements of his orthopedic specialty. Working side by side with Dr. Kagan, MedInformatix provided the flexible system his expansive practice demanded.”

After initial workflow analyses, MedInformatix spent two weeks integrating its software and tailoring its system to Dr. Kagan’s specific requirements. Among his needs were:

- Minimal clicks to access patient records
- Detailing of office procedures including epidurals, lumbar facet blocks and trigger-point injections
- In-depth patient demographics
- Radiology specifics

MedInformatix incorporated these specific requests to its software which already included insurance and billing information. Dr. Kagan’s next step is to add voice recognition to the EMR solution. Combining DragonSpeak with MedInformatix is just another away Dr. Kagan and his staff can expect to move quickly through the Electronic Medical Records.

About Medinformatix:

[www.medinformatix.com](http://www.medinformatix.com)

Medinformatix, Inc. is a leading national provider of fully integrated Electronic Health Records. The products have been built around Medinformatix 25 years of workflow expertise. Our product is designed on a single database using Microsoft SQL. Whether the installation is a single physician who went Live in 1994, a national Cardiology practice, the busiest Radiology practice in Manhattan, or one of 15 other specialties we service, we accommodate their needs. See why so many practices from various specialties choose to use our award winning products: 13 Microsoft nominations in 8 years. Medinformatix can turn the dream of a paperless, integrated practice into a reality.
