To Whom It May Concern:

We are a medical office and have used Medinformatix since 1997.
This software system has served our office extremely efficiently since that time. It is
easy to learn and effective for our needs.

The staff at Medinformatix is always helpful and willing to help us with any support we
may require.

I would recommend Medinformatix to any medical office if their format fits your
practice.

Please feel free to call me with any questions.

Mary Eno, MT(ASCP), MBA

Practice Administrator
