Dear MedInformatix:

I just wanted to write and thank you for your amazing product that has both streamlined our office procedures and made our offices more efficient and productive.

We have been using MedInformatix since 1995, and currently have 3 locations and 50 system users. We utilize the integrated billing, scheduling, collection, and EMR package, and are astounded by the ease of use and the efficiency of this product. Because the system's different parts are fully integrated, our employees are able to make more informed decisions, and this has improved our inter-office communication and financial productivity. The complete integration of MedInformatix allows our users to access clinical data, patient demographics, billing information, and administrative and financial information quickly and securely.

We believe that our patients are the most important part of our practice, and by utilizing MedInformatix we are able to provide better, more efficient patient care. The decisions we make regarding patient diagnosis and treatment are crucial, and with MedInformatix we are quickly able to access all the information necessary to make the best decisions possible. In addition because we are able to create patient medical records and patient bills *while seeing the patient*, we are able to dramatically decrease the time necessary for each patient encounter. This has allowed us to schedule more appointments than ever before and has greatly improved provider productivity.

Our return on investment has been significant, and we believe that our investment in MedInformatix has been one of the best decisions we have ever made. Thank you again for your remarkable product and the continuous support you have provided us for the last eight years. We look forward to many more productive years with MedInformatix.

Sincerely,

A handwritten signature in black ink that reads "Jeffrey H. White".
