

TALLEY EYE CARE P.C.

Vision for Tomorrow

July 16, 2003

Dear MedInformatix:

I just wanted to take this opportunity to thank you for the wonderful support and product we have received from your company. The MedInformatix program is clearly a leader in the Practice Management and Electronic Medical Records industry, and we are looking forward to its continued utilization in our practice.

We have been using MedInformatix since October of 1999, and I am glad to say that I have never regretted choosing your system. MedInformatix is the foundation of our information intranet. It allows our personnel to efficiently and effectively exchange clinical, administrative, and financial information. We are now able to access clinical data, patient demographics, and practice data in a quick and secure environment. We feel that by using MedInformatix we are in a unique position in our region to provide both our personnel and those patients who rely on us with the infrastructure to assure the best care possible.

The decisions we make in our practice are critical to the lives of our patients and to our organizations bottom line. MedInformatix has allowed us to empower our employees to make decisions based on information. MedInformatix is enhancing our practice by combining clinical and financial functionality in one central database. The process of creating a medical record and a bill as the clinical encounter proceeds is a phenomenal advantage that no other practice management system could offer. MedInformatix has a fully integrated functionality that gives a one-stop solution for all our needs.

Thank you again for your assistance and support. It has been a pleasure working with you and your staff, and I look forward to many productive years with you and the MedInformatix team.

Sincerely,

Talley Medical-Surgical Eye Care Associates
